Chestertown Volunteer Fire Company, Inc - Station 6

Probationary Firefighter Training

Probationary Firefighter Record

Congratulations on being voted into the Chestertown Volunteer Fire Company. As one of the busiest fire companies in Kent County, you will find your experiences at Chestertown rewarding, but not without challenge. Your first task responsibility is to successfully complete your probation period. This program is designed to provide you with the knowledge and skills that are necessary on your path to become a firefighter with Chestertown.

There are six sections, designed to be completed at the rate of one per month. If additional time is needed, it may be granted. Your probationary will not end until all sections are satisfactorily completed. Completion of this knowledge and skills training should be the focus of your “down-time” at the fire station. It is expected and understood you will need instruction to learn and understand much of this material. It is your responsibility to seek out the correct information from senior members of the company and prepare yourself for “testing” on it. You will be tested by the membership chairman or his / her authorized designee. During the learning process, any knowledgeable member may help you learn and prepare. Good luck and welcome along.

Probationer: \_\_\_\_\_ ID# \_\_\_\_\_

Date Joined: \_\_\_\_/\_\_\_\_/\_\_\_\_ Anticipated Completion: \_\_\_\_/\_\_\_\_/\_\_\_\_

## Being a Probationary Fireman at Chestertown

The probationary period at Chestertown is a demanding but overall a great experience. The scope and intent of the program is designed for the individual with no previous experience in the volunteer fire service. For those individuals, this program is designed to take six months. The Chestertown VFC will occasionally accept new members possessing extensive knowledge and experience in the fire service. We welcome these individuals and it is our goal to secure them within our ranks with a seamless training period. Using this program as a template, our experienced new member will be indoctrinated into the Chestertown VFC. Depending on the abilities and qualifications of our experienced new member, and considering their ability to complete this program, the probationary period will be no less than 30 days. After that, with this program being successfully completed, the experienced new member may petition the membership committee to exit the probationary program. The decision of the membership committee is binding. However, by being granted this waiver, the experienced new member agrees to continue their membership development by regular participation in drills and meetings for a period of not less than one (1) year.

Proactivity is expected of probationary members at Chestertown VFC. You should be the first one to start doing something and the last one to stop. Many members will form lasting impressions and opinions of you quickly, so make a good impression the first time. Here are some tips:

- When you get here come to an officer and see if anything needs to be completed, i.e. check equipment, turnout gear, etc.
- Walk around the firehouse and make sure things are straightened up and clean. If the trash is full, empty it. If it is dirty, start cleaning it.
- When a dispatch comes in, be the first one up and be fast – even if others are being slow
- If you don't go on the call, get up and do the report. If you go on the call, when you come back make sure the report was done.

- When the station phone rings, be the first one to answer it
  
- If you see a senior member or officer doing something, offer to help.
  
- Be respectful to all you encounter, senior members, officers and members of the visiting public.
  
- Learn all riding assignments, all the equipment and how it is used.
  
- We are here to help you - ask for help or instructions where you need it.
  
- If you do not know someone, stick your hand out and introduce yourself.
  
- Learn our due district. Take the initiative, make yourself a map book. Place emphasis on learning hydrant locations. As the probationary member, one of your very first responsibilities on in-town working fires will be as the "layout-man." Standing in the middle of the street, wondering where the hydrant is (it might be obscured by shrubbery), is not the time to learn locations of hydrants.
  
- Be here. Contribute as much time as you can, and get involved.

Good Luck....

Chestertown Volunteer Fire Company, Inc - Station 6

Probationary Firefighter Training

Section 1 - Company Introduction

Probationer: \_\_\_\_\_ ID# \_\_\_\_\_

Purpose: To introduce the probationer to the Company's history and familiarize them with the rules, regulations and basic operations of the Company.

Chestertown's Organization

- Briefly summarize the history of the Chestertown Volunteer Fire Company.
- List the administrative officers for Station 6: (Members Signature Required)

President: \_\_\_\_\_ Signature: \_\_\_\_\_

1<sup>st</sup> Vice President: \_\_\_\_\_ Signature: \_\_\_\_\_

2<sup>nd</sup> Vice President: \_\_\_\_\_ Signature: \_\_\_\_\_

Secretary: \_\_\_\_\_ Signature: \_\_\_\_\_

Assistant Secretary: \_\_\_\_\_ Signature: \_\_\_\_\_

Treasurer: \_\_\_\_\_ Signature: \_\_\_\_\_

Assistant Treasure: \_\_\_\_\_ Signature: \_\_\_\_\_

Chaplain: \_\_\_\_\_ Signature: \_\_\_\_\_

Board Member: \_\_\_\_\_ Signature: \_\_\_\_\_

- List the fire line officers for Station 6: (Members Signature Required)

Fire Chief: \_\_\_\_\_ Signature: \_\_\_\_\_

Deputy Chief: \_\_\_\_\_ Signature: \_\_\_\_\_

Assistant Chief: \_\_\_\_\_ Signature: \_\_\_\_\_

Assistant Chief: \_\_\_\_\_ Signature: \_\_\_\_\_

Assistant Chief: \_\_\_\_\_ Signature: \_\_\_\_\_

Captain: \_\_\_\_\_ Signature: \_\_\_\_\_

Captain: \_\_\_\_\_ Signature: \_\_\_\_\_

Captain: \_\_\_\_\_ Signature: \_\_\_\_\_

Lieutenant: \_\_\_\_\_ Signature: \_\_\_\_\_

Lieutenant: \_\_\_\_\_ Signature: \_\_\_\_\_

Lieutenant: \_\_\_\_\_ Signature: \_\_\_\_\_

Safety Officer: \_\_\_\_\_ Signature: \_\_\_\_\_

PIO: \_\_\_\_\_ Signature: \_\_\_\_\_

- Explain “chain of command”, it's concept and importance.
- How should a member who has entered the firehouse determine where they are ridding?
- After receiving a riding assignment, what should the member do?
- When a member is leaving or will no longer be riding , what should the member do?
- List some basic responsibilities of a probationary member at Chestertown:

- What are your responsibilities upon returning from a call:
- What units are dispatched for a first due box alarm?
- Briefly describe the responsibilities of the units on a box alarm:
- What units are dispatched for a Motor Vehicle Collision and what order will they respond?
- Where is the station log book located?
- What type of information is entered into the log book?
- Who is responsible for completing the incident report?
- When should you exit the fire apparatus when arriving at the scene of a call?

Demonstrate

- \_\_\_Basic understanding of riding assignments and locations along with equipment locations.
- \_\_\_Ability to enter calls into log book and use the CAD on the Radio Room computer.
- \_\_\_Ability to complete the log book.
- \_\_\_Demonstrate how to answer the fire company phone and take messages. It is especially important that you understand emergency incidents are occasionally received by telephone at the fire station. You must demonstrate you are prepared for this by remaining calm and gathering the correct information.
- \_\_\_Demonstrate what to do if a “walk in” emergency occurs.
- \_\_\_Demonstrate what is needed to be done around the fire house?
- \_\_\_Demonstrate the proper “chain of command”
- \_\_\_Review and understand all standard operating guidelines and procedures (SOG & SOP)

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member’s file.

The below named probationer has demonstrated proficiency in the above information:

Officer: \_\_\_\_\_ Signature: \_\_\_\_\_

Member: \_\_\_\_\_ Signature: \_\_\_\_\_

Date: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

Chestertown Volunteer Fire Company, Inc - Station 6

## Probationary Firefighter Training

### Section 2 - Engine Company

Probationer: \_\_\_\_\_ ID# \_\_\_\_\_

Purpose: To ensure that the probationer understands the functions and responsibilities of the engine company and is able to function as a competent layout-man or line man.

#### Questions

- What year and make are E6, E67 & E68?
- What is the rated pump capacity of our engines?
- How much tank water do our engines carry?
- List and identify the lengths, size and colors of all hoses carried on our engines:
- Identify the type, rated GPM, and essential features of the nozzles carried on our engines:
- What size ladders are carried on the engines?
- What is typically used to extinguish auto or dumpster fires?
- Out of the three engines, what one is to run on Medical Calls/Vehicle Accidents?

- Identify the seating location and responsibilities of each riding assignment on E67/68:

Position 1 -

Position 2 -

Position 3 -

Position 4 -

Position 5 -

Position 6 -

Position 7 -

- When does the layout man get off of the engine and layout? What are the layout man's responsibilities after lying out?

- How will the lineman know what hose to pull on a House Fire, Apartment Fire, etc.?

- Explain the importance of judging how much uncharged line you take inside a building:

## Demonstration

- \_\_\_ Successfully advance all attack lines, alone.
- \_\_\_ Successfully rack all lines, attack and supply.
- \_\_\_ Demonstrate a normal lay and reverse lay.
- \_\_\_ Operate hand line and set up portable monitor.
- \_\_\_ Operate a 2 ½” “Blitz” line in a defensive position alone.
- \_\_\_ Successfully extend a lie with the standpipe rack.
- \_\_\_ Successfully deploy a rack for standpipe operations.
- \_\_\_ Demonstrate donning all PPE and SCBA while in the lineman’s seat in under 60 seconds.
- \_\_\_ Demonstrate “masking up” at the door in less than 20 seconds, while wearing full PPE/SCBA and firefighting gloves.
- \_\_\_ Advance the 250’ 1 ¾” up a ground ladder.
- \_\_\_ Demonstrate several techniques for feeding line as a back up man.
- \_\_\_ Demonstrate proper use of the portable/mobile radio.

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member's file.

The below named probationer has demonstrated proficiency in the above information:

Chestertown Volunteer Fire Company, Inc - Station 6

Probationary Firefighter Training

Section 3 - Truck Company

Probationer: \_\_\_\_\_

ID# \_\_\_\_\_

Purpose: To ensure that the probationer understands the functions and responsibilities of the truck company and is able to function as a competent barman, hookman, outside vent man, or roofman.

Questions

- What year and make is Tower 6?
  
- What is the minimum staffing for Tower 6?
  
  
  
  
  
  
  
  
  
  
- Identify the seating location and responsibilities of each riding assignment on Tower 6:
  - Position 1 -
  
  
  
  - Position 2 -
  
  
  
  
  
  - Position 3 -
  
  
  
  
  
  - Position 4 -
  
  
  
  
  
  - Position 5 -
  
  
  
  
  
  - Position 6 -

- The crew on Tower 6 can be split into two teams. What would be the responsibilities of these two teams?
- When performing horizontal ventilation, the OVM and other members must be careful that their actions do not cause what?
- In general, horizontal ventilation should be first initiated closest to what?
- Describe how horizontal and vertical ventilation tactics must change when a line is not on the fire.
- What is the initial technique for forcing inward opening doors?
- What types of door are the Rabbit Tool used for?
- What member carries the thermal imaging camera?
- In addition to the tools in the bucket, what additional equipment must be taken when going to the roof?
- What saw should be used for a flat roof? For a peaked roof? Explain why.

- Draw a diagram of a basic roof cut on a single family dwelling. Mark the locations of the rafters and the firefighter.
- Draw a diagram of a basic trench cut on a multi-family dwelling. Mark the locations of the rafters and the firefighter.
- How many ladders should be thrown if we arrive on a structure fire where members are inside attacking the fire?
- Describe the procedure and need for performing VES
- The preferred method of shutting off electric is? What if this is not feasible?
- What is the maximum weight load for the Tower's bucket when dry and when flowing water?
- When searching in a dark environment, describe several methods a firefighter can use to remain oriented.
- Describe what materials the "K-12's" are designed to cut.

- Describe the difference between positive pressure ventilation and negative pressure ventilation.
- When may PPV be initiated? How is it most efficiently carried out?
- Prior to cutting holes for vertical ventilation, existing opening should be used. List some openings that can be used.
- Describe two fire situations that would require roof ventilation.
- What level of carbon monoxide should SCBA be used?
- Describe the relationship of the bucket operator and the platform operator as it pertains to the control and operation of the bucket.
- When placing the tower's basket to a roof or flat surface, what must be anticipated and compensated for?
- Describe the correct approach and position for the tower basket to a window for access or rescue operations.

- In what situations should an operator also be present at the platform during basket operations?
- What portion of the tower has primary responsibility for stabilization during aerial operations? What unusual appearance is possible and acceptable at extreme operating angles?
- What size tips are on the master streams on Tower 6? What is the primary one?
- When should the aerial ladder be used on Tower 6?
- When setting up Tower 6 what should be pinned to silence the alarm?
- On uneven or soft terrain, describe options that may allow for more stable setup of the outriggers.
- What side of the Tower is operation of the tower boom most preferable?
- When operating the tower basket below a potentially unstable wall, what distance should the basket be from the building?
- How many ground ladders and lengths does the tower carry?

- What is the primary job of the driver when the aerial ladder is in operation and flowing water?
  
- If the water can is used, what must be done when you get back in quarters?
  
- What is required when any of Chestertown's apparatus is in the backing position?

## Demonstration

- \_\_\_ Placement of all ground ladders using a single man, flat raise and beam raise (35' may use two people), including proper position for window or roof access.
- \_\_\_ Demonstrate 1 and 2 man forcible entry techniques for inward and outward opening doors.
- \_\_\_ Demonstrate thru-the-lock methods for commercial buildings without a k-tool
- \_\_\_ Given several doors, identify the locks and appropriate forcible entry methods.
- \_\_\_ Demonstrate appropriate use of forcible entry saw at various operating positions and heights with proper saw control.
- \_\_\_ Demonstrate the use of a water can to control fire and describe situations where this would be indicated.
- \_\_\_ Demonstrate several primary search techniques, as both lone firefighter or as a team.
- \_\_\_ Demonstrate various drag and removal methods for an unconscious victim.
- \_\_\_ Demonstrate proper removal of an unconscious victim via ground ladder.
- \_\_\_ Demonstrate correct procedure to shut off gas and electric.
- \_\_\_ Demonstrate starting, use and checking of all small motor tools on the Tower.

- \_\_\_ Demonstrate changing the blades on the “K-12s”
- \_\_\_ Given a fire scenario, describe or demonstrate appropriate vertical ventilation for a commercial building, apartment building and private dwelling.
- \_\_\_ Describe or demonstrate methods for performing a trench cut.
- \_\_\_ Successfully hoist an electric fan, hook, bar and ground ladder using rope.
- \_\_\_ Tie a bowline and clove hitch around both an open and closed object.
- \_\_\_ Demonstrate basic proficiency in setting up Tower 6 from a parked position.
- \_\_\_ Properly place the basket for a victim rescue from a window.
- \_\_\_ Properly place the basket for firefighter access to a window.
- \_\_\_ Properly place the basket to flat and pitched roof.
- \_\_\_ Properly place the basket for an at-grade fire attack.
- \_\_\_ While traveling a vertical distance of 30 feet, stay no closer than 6” and no further than 12” from an obstacle.
- \_\_\_ Demonstrate appropriate basket placement and use of the Tower’s ladder pipe for fire attack.

- \_\_\_Demonstrate proper cleaning and maintenance of several hand tools.
- \_\_\_Preform a check of Tower 6.
- \_\_\_Submit an inventory of all tools and appliances on Tower 6.

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member's file.

The below named probationer has demonstrated proficiency in the above information:

Officer: \_\_\_\_\_ Signature: \_\_\_\_\_

Member: \_\_\_\_\_ Signature: \_\_\_\_\_

Date: \_\_\_\_/\_\_\_\_/\_\_\_\_

Chestertown Volunteer Fire Company, Inc - Station 6

Probationary Firefighter Training

Section 4 - Rescue Company

Probationer: \_\_\_\_\_

ID# \_\_\_\_\_

Purpose: To ensure that the probationer understands the functions and responsibilities of the rescue company and is able to function as a competent crew member in a variety of situations.

Questions

- What year and make is Rescue 6?
- What is the minimum staffing for Rescue 6?
- What is the maximum staffing for Rescue 6?
- Identify the seating location and responsibilities of each riding assignment on Rescue 6:

Position 1 -

Position 2 -

Position 3 -

Position 4 -

Position 5 -

Position 6 -

- Similar to the Tower, the crew from the Rescue may split. What would be the responsibilities of the two crews on a Structure Fire?
- How many and what size ground ladders are on Rescue 6?
- With the exception of the driver and officer, all members are to perform what function initially at the scene of a Motor Vehicle Collision with persons trapped?
- Unless otherwise instructed, what will be the order of tasks at auto extrications?
- Why is it important to disconnect a vehicle's battery and what is the preferred method? Should the positive or negative cable be disconnected first?
- If it is necessary to cut the cables of a battery, what should be checked first?
- Prior to the start of extrication, what measures will be taken to protect the patients?
- An un-deployed airbag should be considered live even with the battery cut/disconnected?  
True or False
- Explain the importance of removing interior trim prior to cutting.
- What are two important considerations in selecting a site to place cribbing or other stabilization devices?

- What is a “dash roll” and what are the steps to complete one?
- Prior to lifting with airbags, it must be ensured that what is complete?
- When lifting with airbags, who will give the order to begin and stop?
- While lifting with airbags, it is vital that what occurs simultaneously?
- As an airbag is inflated, what happens to its contact area?
- Prior to inflating, an airbag should be as close to the object as possible. What can be done to take up space between the two surfaces?
- Describe several applications for the air chisel.
- What is the rated capacity of the winch on Rescue 6?
- List the rated capacities of the come-a-longs on Rescue 6.
- What types of blades do we carry for the “K-12” and why?
- What types of rope are carried on the Rescue and how much?

- What is the purpose of an anchor point?
- When directed to assume RIT, where will the crew and equipment assemble?
- List the initial equipment to be assembled for RIT.
- If the RIT is activated, will all members proceed immediately into the building? Explain.
- While standing by as the RIT, explain some fire ground functions that the crew can accomplish.
- Upon reaching a downed firefighter, what is most important initial function?
- Complete and submit an inventory of all equipment on Rescue 6.

## Demonstration

- \_\_\_ Demonstrate stabilizing an upright vehicle with various cribbing methods.
- \_\_\_ Demonstrate stabilizing a vehicle on its side.
- \_\_\_ Demonstrate stabilizing a vehicle on its roof
- \_\_\_ Demonstrate the methods taken to protect trapped patients during extrication.
- \_\_\_ Demonstrate techniques using hydraulic tools to remove doors.
- \_\_\_ Demonstrate the steps for performing a total side wall removal.
- \_\_\_ Demonstrate the procedure for performing a dash roll.
- \_\_\_ Setup the air chisel with portable bottle and demonstrate its use.
- \_\_\_ Setup the airbags and demonstrate basic lifting techniques.
- \_\_\_ Tie the following knots: Figure 8, Figure 8 on a bite, bowline and clove hitch.
- \_\_\_ Identify several acceptable anchor points for rope rescues.
- \_\_\_ Successfully package and place a patient into the stokes basket.

- \_\_\_Appropriately don available harnesses.
- \_\_\_Demonstrate the use of sawzall with or without batteries, including changing blades.
- \_\_\_Demonstrate methods to breach a wood-frame or concrete wall.
- \_\_\_Demonstrate proper packaging of a downed firefighter.
- \_\_\_Demonstrate several methods for dragging, carrying or lifting a downed firefighter.
- \_\_\_Demonstrate procedures for overcoming various SCBA emergencies using your SCBA and a RIT pack.
  - Missing face piece
  - Out of air
  - Equipment failure

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member's file.

Purpose: To ensure that the probationer understands the functions and responsibilities of the support companies and is able to function as a competent crew member in a variety of situations.

Questions

- What is the year and make of Tanker 6?
- What is the year and make of Brush 6?
- What size pump does Tanker 6 have?
- What size pump does Brush 6 have?
- What size tank does Tanker 6 have?
- What size tank does Brush 6 have?
- What is the main purpose of Tanker 6?
- What is the main purpose of Brush 6?
- What is the minimum staffing on Tanker 6?

- What is the minimum staffing on Brush 6?
- What size and color hand lines are on Tanker 6?
- What size and color hand lines are on Brush 6?
- What types of calls can Utility 6 respond on?
- Does Tanker 6 carry air packs?

Demonstration

- \_\_\_Able to identify all equipment on Tanker 6.
- \_\_\_Able to identify all equipment on Brush 6
- \_\_\_Demonstrate how to properly use the booster line on Brush 6.
- \_\_\_Demonstrate how to run and check chain saw on Brush 6.
- \_\_\_Demonstrate proper procedure for setting up fold-a-tank (with assistance)
- \_\_\_Demonstrate proper cleaning and maintenance of several hand tools
- \_\_\_Submit an inventory of all Tanker 6's tools and appliances.
- \_\_\_Submit an inventory of all Brush 6's tools and appliances.

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member's file.

## Chestertown Volunteer Fire Company, Inc - Station 6

### Probationary Firefighter Training

#### Section 6 - Miscellaneous

Probationer: \_\_\_\_\_ ID# \_\_\_\_\_

Purpose: To ensure that the probationer understands the functions and responsibilities of the miscellaneous items in and around the fire house and fire, rescue or medical scene.

#### Questions

- What is the number 1 priority at all times on and off the incident scene?
- What is to be worn at all times when in a moving fire company vehicle?
- What channel are medical incidents ran on in Kent County?
- On what type of alarms will "TAC3" mainly be used for?
- On what type of alarms will "TAC5" mainly be used for?
- Explain why, when possible the officer should switch back to "FIREDISP".
- How many portable radios are on each unit?
- When responding out of the station, what must be hit prior to exiting the building?

- What is to be worn on all Motor Vehicle Collisions when members are in the road way?
- If you are the last one to leave the fire house, what must you make sure is done?
- What other items beside your fire company issued turnout gear, belong in your locker?
- How many meetings are in a month?
- How many drills are held every month?
- What is the phone number to the fire house?

Demonstration

- \_\_\_ Showed regard to safety throughout training.
- \_\_\_ Wore and continues to wear seat belt.
- \_\_\_ Demonstrated proper use and handling of the mobile and portable radios.
- \_\_\_ Demonstrated proper use of the traffic signal button.
- \_\_\_ Maintained and continues to maintain security in the fire house.
- \_\_\_ Maintained a presentable locker.
- \_\_\_ Attended at least three meetings throughout probationary period.
- \_\_\_ Attended at least five drills throughout probationary period.
- \_\_\_ Has a great attitude towards training and constructive criticism.

When the probationer has demonstrated knowledge of the above information, the verifying officer shall sign off below and submit this sheet to the membership committee so that it may be placed in the member's file.
