Mr. Jason Oliphant
Fire Chief of Cut and Shoot
14421 Highway 105
Cut and Shoot, Texas 77306

Place Code: Montgomery: 33906

Dear Mr. Oliphant:

Insurance Services Office (ISO) has submitted a recommendation concerning your community's Public Protection Classification (PPC). Currently, the Community's Public Protection Classification rating is unclassified.

Insurance Services Office is recommending the classification be changed to a Class 4, with an effective date of 09/01/2010. The recommendation is based on a review of your community performed on 04/28/2009 and does include application of the Texas Addendum.

With a single class rating of 4, all class-rated properties will use Class 4.

Public Protection Classifications range from 1 (best) to 10 (worst).

We have reviewed the information provided and believe it is sufficient to grant approval. Enclosed is a PPC Submittal sheet indicating the point totals for the major areas associated with the review. We will notify Insurance Services Office of our approval of the recommendation and of the 09/01/2010 effective date.

If you have any questions regarding this change, I may be reached at the address indicated above or by telephone at (512) 305-7941.

Please make sure all community officials and residents within your district are notified of the new Public Protection Classification rating for your community, and the effective date.

Sincerely,

Jesse James Williams
Deputy State Fire Marshal
PPC Oversight Officer

State Fire Marshal

* Divergence is a reduction in credit to reflect a difference in the relative credits for the Fire Department and Water Supply.

The difference between the protection provided by the fire department and the water supply prevents the better feature from being utilized to its fullest extent. Therefore, an adjustment (divergence) is made to reflect any difference between these two features. Because of the difference in the total weights assigned to the two features, the total for the Fire Department, *which has the higher total weight*, is adjusted to make the comparison reflect the relative adequacies of the two features.

Divergence = 50% (100% water supply credit – 80% of fire department credit)

To Whom It May Concern:

This letter serves as notification that the ISO rating for the Montgomery County Emergency Service District #12 is currently classified as a **4/9**. The district is serviced by Station 21 located at 14421 Highway 105 East. A second station, Station 22 located at 18784 Highway 105 East, is currently being built and is anticipated to be staffed by December 2013.

Please let me know if you have any questions.

Sincerely,

Sharene Carr
Administrative Assistant
